RAFFLES

ENTER THE ILLUSION!

Get lost in a house . . . a house more real than anything you've experienced on a computer before. Lured in by its owner, you must find every gem hidden within its walls before it will release you. But beware! There are real traps, genetically enhanced monster-mice, and a puzzle in every room that will keep you glued to this game for months to come. So be warned! Featuring the most realistic portrayal of a house ever, using the revolutionary 'World Maker' technique to allow you to pick up, move and use virtually every object you find!

Screen shots from Atari ST version.

The Edge, 36/38 Southampton Street, London WC2, England
